

**Amendments to the Claims**

This listing of the claims will replace all prior versions and listings of the claims in the application.

**Listing of Claims**

1. (Currently Amended) A composite film for sealing foil with a substrate, a primer layer and at least one extruded functional layer  
wherein  
between the primer layer and the at least one extruded functional layer an extruded barrier layer is provided which prevents at least the migration of components of the primer layer and/or of the functional layer, wherein the primer layer comprises a cross-linking two component primer.
2. (Canceled)
3. (Currently Amended) The composite film for sealing foil according to claim 1,  
wherein  
a bonding agent layer is provided between the primer layer (~~3~~) and the barrier layer.
4. (Currently Amended) The composite film for sealing foil according to claim 1  
wherein  
between the barrier layer and the functional layer a compatibility agent layer is provided.
5. (Currently Amended) The composite film for sealing foil according to claim 1  
wherein  
the barrier layer and/or the bonding agent layer and/or the compatibility agent layer are coextruded with the functional layer.
6. (Currently Amended) The composite film for sealing foil according to claim 1

wherein

the barrier layer comprises, at least in part, high-density polyethylene ~~of increased density~~, polyester, polyamide or a filled polymer.
